Ken, sharing all I have learned in the last few hours. You'll note Renee Early, not Ramos, negotiated the Programmatic Agreement (PA) for N.C with FERC/ACP.

I am embarrassed I was unaware a N.C. signature was required until late yesterday afternoon as well as the on-going activities with the SHPO. I certainly would have conveyed this during our recent discussions on Va's tree felling activities.

ACP reports they have had many contacts and discussions with the NC

ACP reports they have had many contacts and discussions with the NC SHPOs office, Renee Early, after FERC released the draft PA in November and again when FERC issued the revised Final PA on Jan 5. Based on comments NC SHPO filed on Tuesday, 9th, ACP supported and was pleased FERC incorporated the comments.

When FERC issued the final PA for signature on the 10th, ACP again contacted Renee. She advised that the NC SHPO had no concerns and it would be signed. I'm told we expressed the urgency and Renee said it was going through review up the chain

Renee said it was going through review up the chain within the Department of Historic Resources. ACP's/ Dominion's point person with Renee for the past three years has been Molly Plautz.

N.C. is the final signature required for FERC to issue the Limited Notice to Proceed in tree felling.

Can you please help me, Ken?

Yes.

Thank you.

We will NOT cut trees in NC until permits (401 and ENS) received. VA will begin the day FERC issues order. Hopefully
